Model GC55 Wet/Wet Differential **Pressure Transducer**

Two sensor DP design means three measurement variables in one device. Output, display and switch settings can be set in nearly ANY independent configuaration to monitor, high pressure port (P1), low pressure (P2), differential (P1-P2).

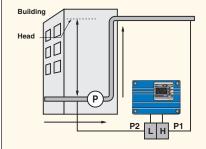

FEATURES

- · Robust aluminum die cast housing
- · Bright LED display of pressure and switch status
- · All stainless steel wetted parts
- · 4-20mA or 1-5Vdc outputs
- Internal "Push-Button" configurability allows quick user pressure range changes or relay adjustments
- · External "Push-Button" allows user to display P1, P2 or DP without opening cover
- Two sensor design well suited for high DP ranges

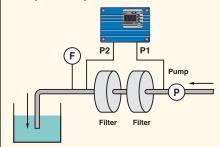

APPLICATIONS

The GC55 utilizes two polysilicon thin film sensors to achieve a wet-wet, high differential, pressure measurement. Fully welded assembly of all stainless steel with high overpressure capability makes the GC55 ideal for fluid pump systems in applications such as:

- · Level measurement in large size and/or pressurized tanks
- Pump monitoring of building hydronic heating and cooling systems

· Filter monitoring in water purification or hydraulic systems

PERFORMANCE SPECIFICATIONS

Analog Output (4-20mA or 1-5Vdc): Accuracy: ± 0.5% FS (Accuracy includes the effects of Linearity, Hysteresis and Repeatability) Response Time: 20msec Output Resolution: 0.2% FS

ASHCRO

Trust the shield."

Pressure Switch Output:

Type: (2) photo MOS relays, rated to 40Vdc/200mA Setting Accuacy: ± 1.0% FS Number of Contacts: 2 Response Time: 20msec - 2.0 sec (by user) Hysteresis: Variable (by user)

Display:

Type: 3½ digit, 10mm LED Accuracy: ± 1.0% FS (URL) + last digit

Standard Ranges (Differential):

.	(
75psi		
100psi	250psi	
150psi	300psi	ATIONO

– ½ Female NPT Conduit

- Cable Gland (cable diameters 0.16" to 0.31") Weight: Approx. 1.0 lb
- Mounting: (2) 5.2mm mounting holes (see installation drawings on back page)
- Media: Fluids and gases compatible with 304SS (sensor housing) and 17-4 pH SS (sensor diaphragm)
