

FEATURES

- · Single setpoint, fixed deadband
- · Single setpoint, adjustable deadband
- Dual setpoint

Ashcroft® is a supplier of highly reliable switches and controls for industrial and process applications. We stress total value to the customer. We begin with rock-solid designs, matching the most appropriate technology with the safety and reliability requirements of the applications. Materials of construction are specified to the exacting standards of Ashcroft®, and product is built to last in the toughest applications. Our modern, responsive manufacturing facility in Connecticut is supported by an extensive network of stocking distributors and factory sales offices located in virtually every part of the world. Special application assistance is always only a telephone call away.

Ashcroft® pressure and temperature switches are designed for the tough applications where conventional designs often don't measure up. A rugged 316 SS or epoxy-coated aluminum enclosure gives uncompromising protection.

Materials of construction have been selected for long life. A wide variety of precision switch elements, including hermetically sealed contacts for added reliability and safety are available to meet every application requirement. The actuators we use have been proven in more than 40 years of service in the world's plants and mills. Multiple features such as dual setpoints and adjustable deadbands are offered. Special designs are available for fire safety, limit control and other stringent requirements. Ease of use is stressed to improve reliability of the installation.

G- and L-Series switches are currently being used successfully in pulp and paper mills, refineries, chemical and petrochemical plants, pharmaceutical plants, dairies, breweries, water and sewage treatment plants, steel mills, and other tough environments. Typical applications are on compressors, pumps, paint spraying equipment, boilers and burners, turbines, reverse osmosis systems, filters and presses.

Pressure & Differential Pressure Switches

G- and L-Series pressure, differential pressure and vacuum switches use two different actuators depending on setpoint requirements. For setpoints between 2 and 3000 psi, the simple, rugged diaphragm- sealed piston actuator is used. This design features high reliability and a choice of actuator seal materials for virtually every application. An optional welded design is also available for setpoints up to 1000 psi for

maximum reliability. This design is available in 316 SS or Monel. Differential pressure models use a unique dual-diaphragm- sealed piston design that features very high static operating pressures and small size.

For setpoints between 4.5 and 150 inches of H_2O , a large diaphragm is used for increased sensitivity in both pressure and differential pressure designs with good choice of materials of construction.

All standard models feature ±1 percent of range setpoint repeatability and a minimum of 400 percent of range proof pressures.

These standard designs perform well in applications where shock and vibration could be a problem and may be used with Ashcroft® diaphragm seals in extreme services such as slurries or abrasive process fluids.

NOTES:

- Switches may generally be set between 15% and 100% of nominal range on increasing or decreasing pressure.
 Consult factory for applications where setpoints must be lower
- All deadbands are give The nominal range column.
 Deadbands shown are for switches with Buna N diaphragm.
 Approximate deadbands for optional diaphragms:
 Viton: Multiply Buna N value by 1.4

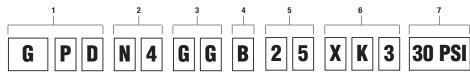

Teflon: Multiply Buna N value by 1.2 Stainless Steel: Multiply Buna N value by 1.7 Monel: Multiply Buna N value by 1.7

- 3. Deadbands for LPA, LDA, GPA, and GDA are adjustable
- between the values shown for all diaphragm materials.

 4. Deadbands for LPS, LPD, LDS, LDD, and GPS, GPD, GDS, GDD models are fixed within the range of values shown.
- 5. Deadbands given are for zero static working pressure.
- 6. Psid models cannot be used in vacuum applications.
- 7. Proof pressure for stainless steel diaphragms is 4000 psi.

G- and L-SERIES PRESSURE SWITCH AND DIFFERENTIAL PRESSURE SWITCH ORDERING INFORMATION

1 - FUNCTION

GPS/LPS - Pressure control, single setpoint, fixed deadband.

GPA/LPA - Pressure control, single setpoint, adjustable deadband. GPD/LPD - Pressure control, two independently

adjustable setpoints, fixed deadband.

GDS/LDS - Differential pressure control, single

setpoint, fixed deadband.

GDA/LDA - Differential pressure control, single setpoint, adjustable deadband.

GDD/LDD - Differential pressure control, two independently adjustable setpoints, fixed deadband.

2 – ENCLOSURE

N4 - NEMA 4, 4X L-Series: Epoxy Coated, Die Cast Aluminum, IP66 G-Series: 316 SS IP65

NOTES:

- 1. These items are wetted by process fluid.
- Ambient operating temperature limits –20 to 150°F, all styles. Setpoint shift of ±1% of range per 50°F temperature change is normal. Switches calibrated at 70°F reference.
- 3. Estimated dc rating, 2.5A, 28 Vdc (not UL listed).
- 4. Estimated dc rating, 4A, 28 Vdc (not UL listed).
- 5. Not UL listed at 480 Vac.
- 6. Standard on G Series "H2O ranges
- 7. Supply static pressure for D/P switches.
- 8. Stainless steel diaphragm only.
- 9. Not available with Buna-N diaphragm.
- 10. Available with GPS/LPS and GDS/LDS models.
- 11. LDS, Buna N and Viton diaphragm only.
- 12. LPS, stainless steel diaphragm only.
- 13. All welded available on pressure models only.
- 14. Order switch and 15-320SX-02T CG seal.
- 15. Order switch and 20-320SX-02T CG seal.
- Not available for temperature ranges.
 Available on L-Series only.
- 18. Not available with dual setpoints.
